

:::: Scope of Work Document

Scope of Work (SOW) -

Build an application or add a unique twist on a common application. The application can be a game, a business support program, or robot to give a few examples. Projects should focus on creating C++ or Swift applications that utilize long-term data storage.

Please submit your Scope of Work Document detailing the application you plan to complete. Your last assignment will implement your plan

Student Project – Scope of Work (SOW)

Project Title: ___Expanded Inventory Management System___

Student Name: ___Timothy Burum___

Date: ___7/16/26___

1. Project Overview

(Write 2–3 sentences about what your project will do.)

An inventory management program which allows users to manage product records through a menu driven interface. Users are able to add, view, update, and delete inventory items, and display the total value of the inventory. All inventory data is saved to a file for long term storage that is loaded each session.

2. Features

- Ability to add inventory items
- Ability to view inventory
- Ability to update items
- Ability to delete items
- Ability to display inventory value.
- Ability to save inventory to file
